

## Don't Miss This Important Update

Specialists from Och Spine at New York-Presbyterian/Weill Cornell Medicine and affiliates share state-of-the-art treatment paradigms for patients with spinal tumors. Emphasis will be placed on metastatic disease, but primary tumors of the spinal cord and spinal column will also be discussed. We will cover the surgical and nonsurgical options, including leading-edge minimally invasive approaches. Providers representing neurological surgery, neuro-oncology, medical and radiation oncology, neuroradiology, and pain anesthesia will be presenting their work.

This webinar is presented by Och Spine at NewYork-Presbyterian/Weill Cornell Medical Center, and is free to attendees. Registration is required. This webinar is NOT accredited for CME
