Endoscopic and Open Surgical Approaches for Craniosynostosis: A Practical Course in Endoscopic, Open, and Virtual Surgical Planning Skills

A Hands-On Practical Course
Saturday, October 14, 2023 / 8:00 am–5:00 pm

ABOUT THE COURSE
Please join us for this innovative symposium from Weill Cornell Medicine, combining classroom instruction with hands-on training using state-of-the-art 3D-printed models created from scans of actual patients. The workshop provides neurosurgeons and plastic surgeons a unique opportunity to practice open cranial vault remodeling, fronto-orbital advancement, and endoscopic suturectomy with Sonopet and the latest endoscopic advancements. Lab time includes instruction in virtual surgical planning (VSP) for complex synostosis and cranial remodeling cases.

Please note that this course is not accredited for CME.

### Educational Objective

By the conclusion of this activity, participants should have acquired:

- enhanced knowledge regarding the diagnosis and treatment options for syndromic and non-syndromic synostosis
- familiarity with the technical skills required for the surgical approach and tools used for open cranial vault remodeling
- familiarity with the technical skills required for the surgical approach and tools used for endoscopic craniectomy
- basic skills in conducting virtual surgical planning (VSP) prior to treatment

### Fees and Registration

Lecture Series + Hand-On Laboratory Course

Fee includes:

- 4 hours of classroom instruction
- 2 hours hands-on training in open and endoscopic techniques
- 2 hours virtual surgical planning (VSP) instruction
- Transportation to/from Stryker

$595 (practicing physicians/surgeons)

$400 (residents, fellows, PAs, other clinicians and trainees)

**REFUND POLICY:** An administrative fee will be retained on all cancellations. All refund requests must be in writing and must be received by September 15, 2023. There are no refunds after that date.
